aguillenperez@ucdavis.edu | Murcia, Spain | (+34) 662.448.206
Deep Reinforcement Learning Researcher

Passionate about **machine learning** and **AI** Ph.D. researcher with **5+** years of experience in **applied AI** and **deep reinforcement learning**, with huge passion for research and solving real-world problems such as cooperative autonomous driving using **multi-agent deep reinforcement learning**, in a collaborative open source style, and strong analytical skills, focus on quality of results and outcomes.

SKILLS

PROGRAMMING
Python, Jupyter Notebook
Java, C++

ARTIFICIAL INTELLIGENCE
Machine Learning (Sklearn)
Deep Learning (Pytorch, Tensorflow)
Reinforcement Learning (Gym, MuJoCo)
Multi-Task / Multi-Modal Learning
Imbalanced Learning
Zero-Shot Learning
Imitation Learning (IRL, LfO, LfD)
Meta Learning
Time Series Forecasting

DATA ANALYST
Data Wrangling (Numpy, Pandas)
Data Visualization (Matplotlib, Seaborn)
Model Interpretability (Captum)
Statistics (StatsModels, Scipy)
High-efficiency software (Dask, CUDA)
Data Debugging (A/B, Logging, Unittest)
Git and Github
VS Code
Amazon Web Services

COURSEWORK

Deep Reinforcement Learning
- Deep Reinforcement Learning - Nanodegree. Udacity
- Practical Reinforcement Learning. Coursera Course Certicates
- Practical Deep Reinforcement Learning for Coders v.1. fast.ai

Computer Vision & Time Series
- Time Series Forecasting. Udacity
- Sequences, Time Series, and Prediction. deeplearning.ai
- Convolution Neural Networks in TensorFlow. deeplearning.ai
- Deep Learning Specialization. deeplearning.ai

EXPERIENCE & EDUCATION

RESEARCH SCIENTIST | Hewlett-Packard Enterprise - AI Labs
Sep 2022 – Now | Silicon Valley, CA, US

- Research on **Deep Reinforcement Learning** and **Trustworthy AI**
- Investigating the state-of-the-art in **Deep Learning** and developing new learning models to accelerate the training of advanced systems

PH.D. | Computer Science, Autonomous Vehicles, and Wireless Comm.
Sep 2018 – Jun 2022 | UPCT | Cartagena, Murcia, Spain

- **Multi-Agent** system trained by **Deep Reinforcement Learning** techniques to control **autonomous vehicles** at intersections in a **cooperative** way using 5G
- I achieved a system capable of effectively controlling **autonomous vehicles** in urban environments that **eliminated accidents** and reduced the **waiting time** by more than **94%** using **collective intelligence**, **learning from demonstration**, and **MADRL**

PREDOCTORAL STAY | University of California, Davis
Jul 2021 – Jan 2022 | Davis, CA, US

- Early detection of throat cancer by biomarker analysis using **NN** specialized in **signal processing** such as LSTM, **transformers**, and **attention mechanisms**
- I obtained an accuracy of over **90%** and I have opened a new **research path** for new platforms capable of **detecting** an infinite **number of diseases**

ASSOCIATE PROFESSOR | Distributed Systems and Services
Sep 2018 – May 2022 | UPCT | Cartagena, Murcia, Spain

- Introducing the students to the concepts of **distributed systems**, such as communication between **remote processes**, **synchronization**, **coordination** and **agreement** techniques, and finally, learning about the characteristics and operation of various types of distributed services

MS. & BS. | Electrical, Electronics and Communications Engineering
Sep 2012 – Sep 2018 | Murcia, Spain
